

LITTLE JULIUS SNEEZER

BY BAKER

THANKS MR. COX

(Continued from page 1)

the State Program of Supervision, the schools must intensify our program of education for good citizenship based on intelligent, loyalty and devotion to our country and its democratic principles.

"We cannot assume any longer that democracy automatically perpetuates itself and that American youth will naturally absorb a love and a devotion for and secure an understanding of democracy from their environment without definite and specific instructions.

"There is more to a National Defense Program than weapons

and soldiers. There are also the questions of understanding what is being defended, of team work, of spirit, and of morals. It is important that the individual have a clear understanding of the nature of democracy; it is important that he become acquainted with our political, social and economic heritage; it is important that he achieve the ability to analyze social, political and economic problems on the basis of available evidence; it is important that he achieve ability to cooperate with others; and that he contribute to upholding social values. But what we need most is a generation trained with a devotion to those principles which will serve as a guarantee of our freedom against

the enemies of democracy who refuse to value the lives of the people who constitute the State—a devotion so strong that we will be willing to fight for them and, if necessary, die for them.

"This is an appeal to the Superintendents, Supervisors, Principals and Social-Studies Teachers of the State to organize without delay, a program for the purpose of teaching Americanism to every pupil in the school from the first grade through the eleventh."

Bravo! Mr. Cox. Neatly and aptly phrased. But he goes further and has made some specific suggestions as to how this can be accomplished. In next week's article we will pass these along to our readers.
